Professional Summary

Backend-focused software engineer with 3 years of experience building scalable web services and mobile applications using **Go**, **Node.js**, **Flutter**, and **AWS**. Experienced in designing REST APIs, secure data workflows, and containerized deployments. Contributed to healthcare and SaaS platforms supporting 40k+ users while collaborating with Agile teams of up to 20 developers. Interested in backend architecture, distributed systems, and developer infrastructure.

Technical Skills

Languages: Go, TypeScript, JavaScript, Python, Java

Backend: Node.js, Express, REST APIs, Microservices, GraphQL

Frontend: Flutter, React, HTML5, CSS3

Databases: PostgreSQL, MongoDB, SQL

DevOps/Cloud: Docker, AWS, Azure, Linux, CI/CD

Security: Vulnerability Assessment, Penetration Testing, Secure Coding

Experience

Techasoft Pvt. Ltd.

Software Development Intern (Python)

Bangalore, India

Mar 2026 – Present

- Developed Python-based automation and AI solutions for FMCG manufacturing; deployed and validated systems across **3 production plants**.
- Coordinated with factory teams and client stakeholders for on-site implementation, testing, and operational approvals.
- Assisted with cross-functional technical tasks to ensure timely delivery in industrial environments.

Medoc Health IT

Project Management Intern (Engineering Role)

Remote

Jul 2024 – Jul 2025

- Led development of a healthcare platform using Flutter, Node.js, and AWS integrated with Indian e-health APIs.
- Coordinated Agile delivery across 15–20 developers for deployments used by **3+ hospitals**.
- Built secure backend workflows managing data for **40,000+ patients**.
- Built a secure KMS system using Go.

Appable Technologies

Freelance Software Developer

Remote

Jul 2023 – Jun 2024

- Developed sports and HRMS platforms using Node.js, and MongoDB.
- Built backend APIs and authentication systems serving **2–3k active users**.
- Strengthened platform security through server hardening and penetration testing.

Medoc Health IT

Software Development Intern

Remote

Aug 2022 – Jul 2023

- Developed UI modules and REST APIs using Flutter, Node.js, and SQL.
- Contributed to Docker-based deployment workflows and CI/CD automation.
- Improved application performance and reliability through debugging and optimization.

Projects

Personal Bahi Khata (Flutter, Encryption)

Offline-first expense tracker parsing bank SMS automatically with AES encryption and Gzip compression. GitHub

Zundrath (Go, Cryptography)

Local key management system implementing symmetric encryption and secure key handling. GitHub

Accounting & Inventory System (Node.js, Flutter, PostgreSQL, Docker)

Inventory and analytics platform with REST APIs, role-based access control, and cloud deployment. GitHub

Education

B.Tech in Computer Science and Engineering

LNCT University, Bhopal

2025
